EDUCATION

National University of Singapore **Aug 2025 - Present**
Bachelor of Computing in Computer Science
- Double Major in Statistics

Victoria Junior College **Feb 2021 - Dec 2022**
Biology, Chemistry, Math, Economics Track
- Rank Points: 88.75
- School Distinguished Service Award
- Singapore Schools Sports Council Colours Award

WORK EXPERIENCE

Ministry of Social and Family Development (Singapore), *Call Operator* **Mar 2025 - Jun 2025**
- Handled public enquiries primarily related to the Baby Bonus and Government-Paid Leave schemes via incoming calls.
- Developed a strong working knowledge of relevant policies and guidelines to deliver accurate and timely information to public.
- Cultivated a professional and approachable communication style to ensure positive interactions with diverse callers.

Tinkeracademy (Singapore), *Part-Time Teaching Assistant* **Feb 2025 - Dec 2025**
- Conducted tech enrichment workshops for students, with a focus on design thinking and digital tools such as Figma.
- Supported lead instructors in classroom management, guiding students through hands-on projects and creative problem-solving tasks.
- Encouraged student engagement and fostered a positive, growth-oriented learning environment.

CO-CURRICULAR ACTIVITIES

NUS Developer Group, *External Tech Associate* **Jul 2026 - Present**
- Developed and maintained the backend payment system for Children Society's website, integrating Stripe for secure online payments.

PROJECTS

Open House Website, *UI/UX* **Feb 2026 - Apr 2026**
- Built a public-facing React website for the NUS College of Alice & Peter Tan Open House 2026, providing prospective students with centralised access to event details, tours, sample classes, admissions information, and directions.
- Designed responsive layouts using JavaScript, CSS, and Tailwind CSS, ensuring the website remained visually consistent and accessible across desktop and mobile devices.
- Repository Link: https://github.com/CAPT-OpenHouse-2026/website2026
- Website Link: https://openhouse.captlife.com/

Kasane Safari Map Tracker, *Personal Project* **Jun 2026 - Jul 2026**
- Built a full-stack React web application inspired by a trip to Kasane, Botswana, enabling users to report and share sightings on an interactive map.
- Integrated React-Leaflet and Leaflet to support interactive map markers, GPS-based geolocation, animated map navigation, and regular, satellite, and hybrid map views.
- Developed a Supabase PostgreSQL backend to store sighting data, automatically expire time-sensitive reports, and synchronise new sightings across users.
